

Open Findings Report

Generated 2026-09-07 06:27:08Z

All currently open and manual-review findings across the inventory. Resolved and muted findings are excluded. This snapshot is not a new scan and does not establish that other resources are clean.

SEVERITY OF OUTSTANDING FINDINGS

Each finding is one resource/engine/check pair, regardless of how many scans reported it. Last seen records the most recent verdict, not a guarantee that the problem is still reproducible. Findings from engines that do not report passes may remain open until explicitly resolved.

Findings by check

Exposed .git configuration	critical	nuclei	http/exposures/configs/git-config	1 instance
Apache server-status exposed	high	nuclei	http/misconfiguration/server-status	1 instance
TLS certificate expires in 6 days	high	nuclei	ssl/expired-certificate	1 instance
Directory listing enabled	medium	nuclei	http/exposures/files/directory-listing	1 instance
Strict-Transport-Security header missing	medium	nuclei	http/misconfiguration/missing-hsts	2 instances
Server version disclosed in response headers	medium	nuclei	http/technologies/version-disclosure	1 instance
dns/caa-fingerprint; No CAA record published	low	nuclei	dns/caa-fingerprint	2 instances
Session cookie set without the Secure attribute	low	nuclei	http/misconfiguration/cookies-without-secure	1 instance
Content-Security-Policy header missing	low	nuclei	http/misconfiguration/missing-csp	2 instances
dns/caa-fingerprint	low	prowler	dns/caa-fingerprint	1 instance

Detailed findings

#1  Exposed .git configuration critical

http/exposures/configs/git-config

Instances 1

https://owasp.org/www-project-web-security-testing-guide/

 nuclei  exposure  config  git

DESCRIPTION

The deployed site exposes its **Git configuration**, which can reveal repository metadata and **credential** values.

RECOMMENDED ACTION

1. **Block dotfile paths** at the edge.
2. Remove the **.git** directory from the deployed artifact.
3. Follow the [incident response guide](#) and rotate exposed credentials.

Instances (1)

NAME	REGION	TYPE	UID
 dns/example-account: legacy.example.com	—	—	legacy.example.com

Evidence · 01a07a8c-9360-3328-e499-b2a4bd876f12#1 · https://legacy.example.com/.git/config

Matched: status

Details

```
{
  "curl": "curl -sS -i 'https://legacy.example.com/.git/config'",
  "extracted": [
    "url = https://git.example.com/platform/legacy-portal.git"
  ]
}
```

#2  Apache server-status exposed high

http/misconfiguration/server-status

Instances 1

 nuclei  misconfig  apache  disclosure

RECOMMENDED ACTION

Restrict mod_status to localhost or remove the module from the production build.

Instances (1)

NAME	REGION	TYPE	UID
 dns/example-account: legacy.example.com	—	—	legacy.example.com

Evidence · 01a07a8c-9360-3328-e499-b2a4bd876f12#2 · https://legacy.example.com/server-status

Matched: word

Details

```
{
  "curl": "curl -sS -i 'https://legacy.example.com/server-status'"
}
```

#3

 TLS certificate expires in 6 days

high

ssl/expired-certificate

Instances 1

 nuclei

 ssl

 expiry

RECOMMENDED ACTION

Renew the certificate and confirm the ACME renewal hook is scheduled.

Instances (1)

NAME	REGION	TYPE	UID
 dns/example-account: status.example.com	—	—	status.example.com

Evidence · 01a07a8c-9360-3328-e499-b2a4bd876f12#3 · status.example.com:443

Details

```
{
  "extracted": [
    "notAfter=2026-03-20T00:00:00Z"
  ]
}
```

#4

 Directory listing enabled

medium

http/exposures/files/directory-listing

Instances 1

 nuclei

 exposure

 listing

RECOMMENDED ACTION

Disable autoindex for the assets prefix.

Instances (1)

NAME	REGION	TYPE	UID
 dns/example-account: docs.example.com	—	—	docs.example.com

Evidence · 01a07a8c-9360-3328-e499-b2a4bd876f12#7 · <https://docs.example.com/assets/>

#5

 Strict-Transport-Security header missing

 medium

http/misconfiguration/missing-hsts

Instances 2

 nuclei

 headers

 hsts

RECOMMENDED ACTION

Add Strict-Transport-Security with a max-age of at least 31536000 at the edge.

Instances (2)

NAME	REGION	TYPE	UID
 dns/example-account: billing.example.com	—	—	billing.example.com
 dns/example-account: docs.example.com	—	—	docs.example.com

Evidence · 01a07a8c-9360-3328-e499-b2a4bd876f12#4 · <https://billing.example.com/>

Evidence · 01a07a8c-9360-3328-e499-b2a4bd876f12#5 · <https://docs.example.com/>

#6

 Server version disclosed in response headers

 medium

http/technologies/version-disclosure

Instances 1

 nuclei

 disclosure

 headers

RECOMMENDED ACTION

Set ServerTokens Prod so the banner no longer advertises the patch level.

Instances (1)

NAME	REGION	TYPE	UID
 dns/example-account: legacy.example.com	—	—	legacy.example.com

Evidence · 01a07a8c-9360-3328-e499-b2a4bd876f12#6 · <https://legacy.example.com/>

Details

```
{

    "Server: Apache/2.4.29 (Ubuntu)"
  ]
}
```

#7 dns/caa-fingerprint; No CAA record published 🕒 low

dns/caa-fingerprint

Instances 2

nuclei dns caa

RECOMMENDED ACTION

Publish a CAA record naming the issuers permitted for this zone.

Instances (2)

NAME	REGION	TYPE	UID
dns/example-account: billing.example.com	—	—	billing.example.com
dns/other-account: billing.example.com	—	—	billing.example.com

Evidence · 01a07a8c-9360-3328-e499-b2a4bd876f12#11 · billing.example.com

#8 Session cookie set without the Secure attribute 🕒 low

http/misconfiguration/cookies-without-secure

Instances 1

nuclei cookies session

RECOMMENDED ACTION

Set Secure, HttpOnly and SameSite on every session cookie.

Instances (1)

NAME	REGION	TYPE	UID
dns/example-account: id.example.com	—	—	id.example.com

Evidence · 01a07a8c-9360-3328-e499-b2a4bd876f12#8 · https://id.example.com/login

#9  **Content-Security-Policy header missing** low

http/misconfiguration/missing-csp

Instances 2

 nuclei  headers  csp

RECOMMENDED ACTION

Publish a Content-Security-Policy, starting in report-only mode.

Instances (2)

NAME	REGION	TYPE	UID
 dns/example-account: billing.example.com	—	—	billing.example.com
 dns/example-account: status.example.com	—	—	status.example.com

Evidence · 01a07a8c-9360-3328-e499-b2a4bd876f12#9 · <https://billing.example.com/>

Evidence · 01a07a8c-9360-3328-e499-b2a4bd876f12#10 · <https://status.example.com/>

#10  **dns/caa-fingerprint** low

dns/caa-fingerprint

Instances 1

 prowler

Instances (1)

NAME	REGION	TYPE	UID
 dns/example-account: billing.example.com	—	—	billing.example.com
